■ **KIT # R4B-L (Includes)**

- (1) Part # RONDC1
- (2) Part # ROBLTE1

■ **Optional AC Remote On / off Node**

Part # RONAC1

■ **Meet the Crew**

Remotes-4-Boats Lite (R4B-L) is a simple, low cost, two button remotely operated system that allows you to activate any combination of two (2) DC outputs (such as lights, blower, CD radio/ stereo, etc) or one DC motor (such as engine tilt, trim tabs, engine cover, etc.)

This cost effective system is designed for the boater who wants the safety and convenience of remotely controlling only one or two specific electrical systems versus the more advanced R4B-S system that has a seven (7) button remote and incorporates an advanced Intelligent Processing Module (IPM). The R4B-L system includes one (1) system module (part # RONDC1) and two (2) remotes (part # ROBLTE1). *

Here is a partial list of the common small boat systems you can activate with the R4B-L:

- Bilge blower
- DC lighting
- CD radio / stereo
- Engine covers
- Trim tabs
- Instrumentation

If at a later date you choose to upgrade the R4B-L to the standard R4B-S system with Intelligent Processing, you can use the RONDC1 module as a Remote On/off Node (RON) to wirelessly activate any DC vessel system.

To activate any AC controlled system (such as dock lights, power winch, etc.) you can add the optional Remote On/off Node (RON) – part # RONAC1

■ **Limited Warranty**

Wireless on Water, LLC products are warranted for a period of One (1) Year from original ship date to the original purchaser from the manufacturer or an authorized dealer, to be free from defects in material and workmanship when properly used and maintained by the Purchaser. SEE SPECIFIC WARRANTY IN PACKAGE INSERT FOR FULL WARRANTY DETAILS.

■ **Technical Specifications**

Case: ABS - UL94 V-0 flammability rating
 Outputs: 20 amps / output: 40 amps max
 System: Normal operation: 6 – 30 VDC
 Active current: 30 mA typical
 Standby current: < 1 mA typical
 Operating Temperature range: - 40° to 70° C

FCC Notice: This device has not been authorized as required by the rules of the Federal Communications Commission. This device is not, and may not be, offered for sale or lease, or sold or leased, until authorization is obtained.

* Up to 32 remotes can be linked to the R4B-L system.
